

ACTION INNOCENCE MONACO

Internet is a fantastic means of communication, more often than not present in our homes via the smartphone and computer. It has also become our children's favourite means of communication.

The first mission of AIMC contributes to protecting the dignity and integrity of children on the Internet. Our Association in collaboration with the Department of Education offers a program of prevention in schools in Monaco but also in France to the attention of children and adolescents. The essential goal of this prevention program led by a psychologist is to develop young people's critical thinking and decision-making skills, emphasising the fact that the Internet is a blend of the best and the worst. At the same time, the Association is trying to increase awareness amongst parents and educators so that they can work with us as partners.

Since 17 years, our association has been aware of the dangers of the Internet more than 650000 children and more than 8 000 parents and professionals in the school system. 2370 preventions have been carried out in schools.
